## Product information.

### **CESA - sporty wheelchair for kids & adolescents.**

With **CESA HOGGI** launches a new sporty wheelchair and extends the range of active wheelchairs for kids and adolescents. The **box frame construction** provides **CESA** with an huge rigidity despite its low weight. Thanks to the special box frame construction seat height, seat angle, wheel base and active degree can be adjusted independently of the chassis.

An expensive and defective calibration/adjustment of wheel fork and wheel track of the rear wheels is prevented completely.

The patented frame concept consists of sparse components and can be adjusted only by one hexagon allen wrench.

#### **Further USP:**

The **wheel base** can be adjusted independently of the active degree with the aid of a **slide axis**. In this way the wheel base can be adapted to the seat depth and it is possible to keep a steady footrest angle sovereign of the seat depth.

In addition the weight can be scattered optimally on rear and front wheels - an important feature for energy efficiency and dynamic driving quality.

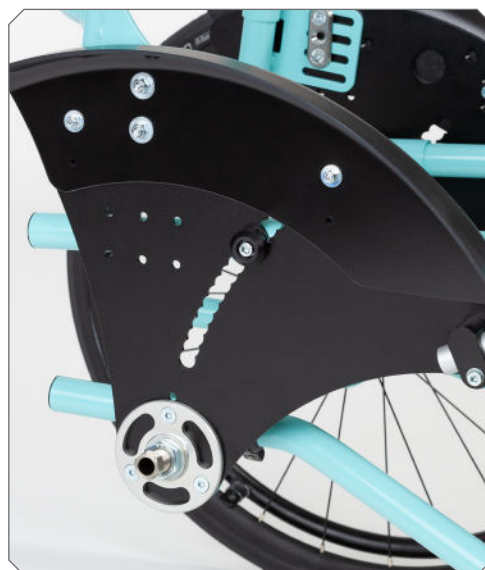

#### **CESA convinces also with an enormous growth capacity:**

- Seat depth up to 10 cm without any application of additional items
- Seat width up to 2 cm with distance elements.

Next to a high variation of colours and designs **CESA** offers a wide range of options and accessories.

*Box frame construction.*

*Side plate (seat angle adjustment).*

*Modern, sporty design.*

## Technical data.

### 3 frame sizes:

- Size 1 with 20" rear wheels / Seat widths: 24-30 cm / Seat heights 36-42 cm
- Size 2 with 22" rear wheels / Seat widths: 28-36 cm / Seat heights 37-45 cm
- Size 3 with 24" rear wheels / Seat widths: 36-44 cm / Seat heights 41-49 cm  
(Increments of seat widths and seat heights in 2 cm steps)

### 2 backbase versions:

- (with each 20, 25, 30, 35 cm backrest height, optionally with backrest panel or backrest cover)
- Backrest, angle adjustable (78° to 108° in 6° steps), foldable

### 4 footrest versions:

- Footrest, one piece, angle adjustable
- Footrest, one piece, angle adjustable, flip up type, schwenkbar
- Footrest, one piece, angle adjustable, hoch (for short lower leg lengths)
- Single foot rests, angle adjustable, flip up type

### Lower leg lengths:

- Frame size 1: 10-39 cm
- Frame size 2: 10-43 cm
- Frame size 3: 10-47 cm

### Frame angle: 100°

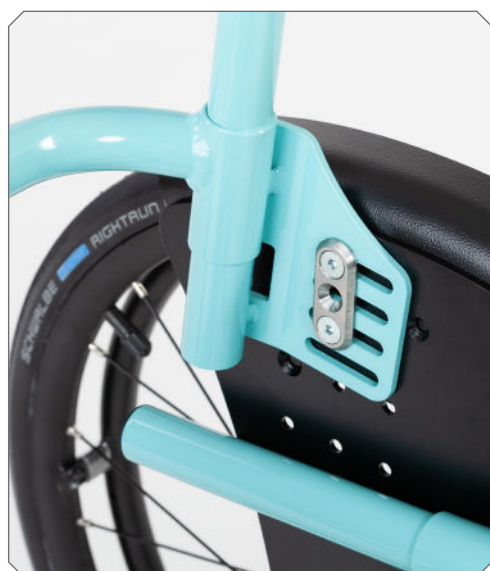

**Seat angle:** 0° bis 10° in 2° steps (+/- 1°)

**Weight capacity:** 100 kg

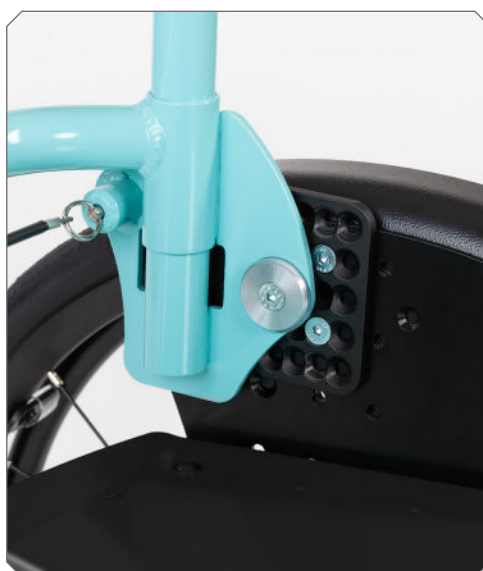

**Camber:** 3°, 6°, 9° and 12°

**Seat width convertible:** +2cm

**Front wheel diameter:** 4", 5" and 5,5" (100, 125 and 140 mm)

*Back base, rigid.*

*Back base, foldable.*

*CESA with seat panel.*
